Description

Mercury 60 EFI FormulaRace - Mercury Racing is pleased to announce the introduction of the all-new Mercury 60 EFI FormulaRace outboard. The 60 h.p. in-line four-cylinder engine expands Racing's breadth of low-emissions 4-strokes; an offspring of the venerable Verado 350 SCi outboard. The two join Mercury Racing's line of OptiMax "XS" series of low-emissions 2-stroke consumer outboards.

The engine, built at Mercury Marine's state-of-the-art outboard manufacturing facility in Suzhou, China, was designed specifically to meet increasing demand for engines in support of the popular Mercury FormulaFour outboard tunnel boat racing series. The series, featuring one-design 14-foot tunnel race boats powered by a production Mercury 60 EFI 4-Stroke outboard, was originated by Brunswick Marine Sweden and their dealer Mikael Frodé.

Although racing is basically exempt from emissions regulations, event promoters are beginning to realize that they need to create new classes and/or update existing boats with emissions compliant power. The 60 EFI FormulaRace provides racers and promoters with an affordable modern engine which is also environmentally responsible. Racing communities throughout Germany, Poland, China and the Middle East have expressed interest in the Mercury FormulaFour series.
